Product Description: Who's winning and who's losing? Going far beyond the major powers and the BRIC countries, this new economic statistical tome compares the nations of the world in six sections: 1. Population. 2. GDP Per Capita. 3. GDP. 4. Growth Rates of Population. 5. Growth Rates of GDP Per Capita. 6. Growth Rates of GDP. This book provides hard data for all who ponder the shifting sands of power, whether economic, military or demographic, and seek keys to decipher the media news. Dr. Avakov's annual title 'Quality of Life, Balance of Powers, and ...' is a snapshot of world statistics, including undeclared nuclear weapons. This new work, 'Two Thousand Years of Economic Statistics: World Population and current price GDP data in a historical perspective. This statistical volume contains data from historical publications. It gives statistics for two groups of countries in their 2007 borders. First, since year 1950 (for 1950, 1960, 1970, 1980, 1990, 2000, and 2007), it provides statistical data for all countries of the world (232 countries). Second, since year 1 AD (for 0001, 1000, 1500, 1600, 1700, 1820, 1870, 1880, 1890, 1900, 1913, 1920, 1929, and 1938), it provides data for a smaller group of countries (133 countries). This book is based on the groundbreaking works of Angus Maddison but it differs from his books in that it gives data up to the most recent year available and calculates GDP (gross and per capita) in the prices of that most recent year. For the recent years, the World Bank, CIA, and Encyclopedia Britannica were principal sources. But, despite the author's great debt to these sources, the preponderance of data in the book is not direct citations from them but rather the result of calculations. Among other computational techniques he uses a new logarithmic interpolation which takes care of cross-country statistical distortions when calculating in the prices of the most recent year. For every line of data (for every country, each year), he provides a note on the technique used in obtaining his estimate (i.e., proxy, exponential interpolation, direct estimate with source citation, etc.).

Sleep Switch (On/Off)

On the top right edge of the iPhone, you'll find a button shaped like a dash. It's silver metal on the iPhone 3G; it's black plastic on the original.

This, ladies and gents, is the Sleep switch. It has several functions:

- **Sleep/Wake.** Tapping it once puts the iPhone to sleep—that is, into Standby mode, ready for incoming calls but consuming very little power. Tapping it again turns on the screen, so it's ready for action.
- **On/Off.** This switch can also turn the iPhone off completely, so it consumes no power at all; incoming calls get dumped into voicemail. You might turn the iPhone off whenever you're not going to use it for a few days.

To turn the iPhone off, press the Sleep/Wake switch for 3 seconds. The screen changes to say, "slide to power off." Confirm your decision by placing a fingertip on the red right-pointing arrow and sliding to the right. The device shuts off completely.

Tip If you change your mind about turning the iPhone off, tap the **Cancel** button, or do nothing. If the iPhone decides that you're not paying attention, it dismisses the "slide to power off" screen automatically.

To turn the iPhone back on, press the switch again for 1 second. The chromelike Apple logo appears as the phone boots up.

- **Answer call/Dump to voicemail.** The upper-right switch has one more function. When a call comes in, you can tap it *once* to silence the ringing or vibrating. After four rings, the call goes to your voicemail.

You can also tap it *twice* to dump the call to voicemail immediately. (Of course, because they didn't hear four rings, iPhone veterans will know that you've blown them off. Bruised egos may result. Welcome to the new world of iPhone Etiquette.)

Locked Mode

When you don't touch the screen for 1 minute, or when you put the iPhone to sleep, the phone *locks* itself. When it's locked, the screen isn't touch-sensitive. Fortunately, you can still take phone calls and control music playback.
